Business Type: Producer

Turbomecanica is an international recognized manufacturer and supplier of high complexity engines & helicopter components for programs as: TRENT 700, TRENT 900, CFM Engines, AW109/119. Our company is actively engaged on the international market, developing cooperation programs with prestigious aeronautical companies, working from the beginning of its history under ROLLS-ROYCE (UK), TURBOMECA and AEROSPATIALE (later EUROCOPTER, now AIRBUS- France) licenses. Turbomecanicas' reputation is based on engineering experience, quality assurance system and NADCAP approved in-house special processes.

Our main activity for over 40 years of experience in aviation industry includes:

- MRO of TURMO IVCA/C engines and mechanical assemblies (main gear box, intermediate and tail gearboxes, main rotor head) for PUMA helicopters and VIPER 632-41R/M engines for IAR 99 SOIM training aircrafts („traditional products”)
- Manufacture of high-technology and high-quality equipment, components and parts of TGB (tail gearboxes) and MGB (main gearboxes) from new generation of helicopter engines of civil applications, for AW109 and AW119MKII FINMECCANICA - Italy helicopters, high-complexity engine components for customers General Electric, Rolls-Royce; HONDA Aero; AVIO; AVIALL
- An extensive range of conventional and unconventional machining, surface enhancement and heat treatments (all in house and NADCAP approved) as surface coatings, thermal/ thermo-chemical treatments, Nondestructive Testing - NDT for different type of parts and materials;
- General assembly, product testing on specific test-bench, inspection, verification and testing laboratory, after-sales services and technical support - for VIPER and TURMO engines, IAR 330 mechanical assemblies (PUMA helicopter) and TGB assembly (AW109/119 helicopters).
- Research and development in aviation industry profile.

Turbomecanica is authorized by the Romanian Civil Aeronautical Authority as Authorized Sales Organization for the manufacturing of assemblies and components for Finmeccanica helicopters AW109 and AW119 MKII. (EASA Part 21 G).

Romania country profile

Romania, in southeast Europe, is mountainous in the north while the main feature in the south is the vast Danube valley. The river forms a delta as it approaches the Black Sea, which is a wildlife reserve for countless native and migratory birds.

The Romanian parliament consists of two chambers, the Senat (Senate), which has 140 members, and the Camera Deputaților (Chamber of Deputies), which has 345 members. The members of both chambers are chosen in elections held every four years.

Ethnically, the population is 90% Romanian and 7% Hungarian. The Romanian language, like a number of others in southern Europe, is directly descended from Latin, although Romania is separated from other Romance-language countries by Slav speakers. Romania has considerable natural resources – oil, natural gas, coal, iron, copper and bauxite. Metal-working, petrochemicals and mechanical engineering are the main industries.

Romanian specialities include grilled meatballs, pork stew with garlic and onions and doughnuts made with cream and cheese.

The spine-chilling tale of Dracula is based on the 15th century Romanian Count Vlad Dracul whose son was famous in wartime for impaling captured enemies. Well-known Romanians include the writer Eugene Ionesco, the gymnast Nadia Comaneci and the composer George Enesco.

Official name: Romania

Area (km²): 237 500

Population: 19.94 million (2014, Jan.)
